

VAULTEDDON

SECURE • DECENTRALIZED • EMPOWERED

X @Vaulteddon |  vaulteddon.com |  t.me/vaulteddon

01

EXECUTIVE SUMMARY

VaulteddDon is a next-generation decentralized finance (DeFi) platform that unifies cross-chain bridging and flexible staking vaults into one secure, scalable ecosystem.

Our mission is to make blockchain interoperability **fast, secure, and accessible**, while delivering sustainable rewards backed by **real economic activity**.

By integrating a decentralized multi-chain bridge with a **real-yield vault** system, **VaulteddDon** solves the critical challenges of today's DeFi landscape—complex transfers, fragmented liquidity, and inflation-driven rewards.

“**VaulteddDon** is building the infrastructure for a borderless financial future.

KEY HIGHLIGHTS

CROSS-CHAIN INTEROPERABILITY

Seamless asset transfers across multiple major blockchains with low fees and fast finality.

FLEXIBLE VAULTS

Stake with confidence using customizable lock periods and auto-compounding rewards.

SUSTAINABLE ECONOMICS

Real yield model with deflationary mechanics and controlled emissions.

SECURE & AUDITED

Built with security at the core using multi-sig custody, oracles, and audits.

COMMUNITY GOVERNANCE

Users shape the future through veVLD voting and decentralized governance.

OUR VISION

To become the leading cross-chain DeFi ecosystem, powering the movement of value and the generation of real yield for the global Web3 community.

02 THE PROBLEM

Despite the rapid growth of DeFi and blockchain adoption, the ecosystem remains fragmented, inefficient, and unsustainable.

FRAGMENTED LIQUIDITY

Assets are scattered across multiple blockchains and protocols with no unified liquidity layer, making it difficult for users to access the best yields and opportunities.

EXPENSIVE & SLOW CROSS-CHAIN TRANSFERS

Existing bridge solutions are costly, slow, and rely on centralized intermediaries — resulting in high fees, delays, and security risks.

UNSUSTAINABLE STAKING REWARDS

Many projects depend on inflationary token emissions to fund rewards, leading to value dilution, unsustainable APYs, and long-term instability.

CENTRALIZATION RISKS

Centralized control, opaque operations, and lack of transparency expose users to counterparty risk, exploits, and a loss of trust in the system.

VAULTEDDON

SECURE TODAY. PROTECT TOMORROW.

PROTOCOL WHITEPAPER

PAGE 04

03

THE VAULTEDDON SOLUTION

VaulteddDon Protocol unifies cross-chain liquidity, secure asset custody, and sustainable yield generation into a single, decentralized ecosystem.

CROSS-CHAIN BRIDGE

Seamless asset transfers across multiple blockchains in seconds.

REAL-YIELD ENGINE

Sustainable yield mechanisms powered by real economic activity.

SMART VAULTS

Non-custodial vaults with customizable strategies and risk management.

SECURITY FIRST

Audited smart contracts, multi-sig security, and on-chain transparency.

COMMUNITY GOVERNANCE

Decentralized governance via veVLD voting.

One Protocol.
Unlimited Possibilities.
True Financial Freedom.

HOW IT WORKS

1. CONNECT

Connect your wallet and choose your preferred chain.

2. BRIDGE

Move assets securely across chains using VaulteddDon Bridge.

3. DEPOSIT

Deposit assets into smart vaults with custom strategies.

4. EARN

Earn real yield from sustainable sources and network fees.

5. GOVERN

Participate in governance and help shape the future of VaulteddDon.

VAULTEDDON.COM

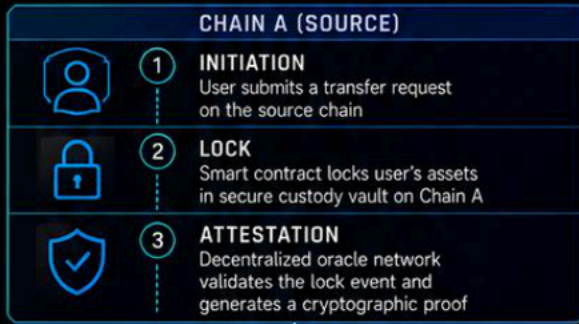

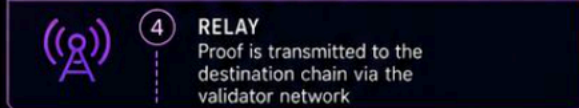

04 Bridge Architecture: Bilateral Matching Protocol

VaulteddDon Bridge operates on a lock-mint / burn-release model with bilateral verification to ensure assets are matched and validated on both sides of every cross-chain transfer.

→ OUTBOUND TRANSFER (CHAIN A → CHAIN B)

RELAY LAYER

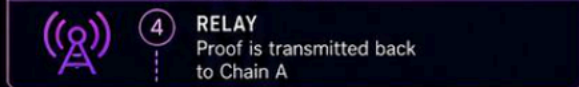

CHAIN B (DESTINATION)

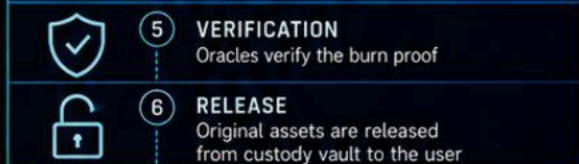

← RETURN TRANSFER (CHAIN B → CHAIN A)

RELAY LAYER

CHAIN A (DESTINATION)

BILATERAL MATCHING LOGIC

COMPONENT	CHAIN A (SOURCE)	CHAIN B (DESTINATION)
 CUSTODY	Lock vault	Mint contract
 VALIDATION	Oracle attestation	Oracle verification
 STATE SYNC	Emits lock event	Confirms mint event
 REVERSE FLOW	Release on burn proof	Burn triggers release

Every transaction requires matching confirmations on both chains before state changes are finalized.

ATTACK VECTOR PROTECTIONS

THREAT	PROTECTION
 DOUBLE-SPENDING	Cannot mint without valid lock verified by oracle consensus
 ORPHANED ASSETS	Timeout mechanism — locked funds are returned if attestation fails
 FALSE RELEASES	Cannot unlock without verified burn proof
 ORACLE MANIPULATION	Multi-oracle consensus required — no single validator can falsify

BRIDGE SECURITY LAYERS

 MULTI-SIGNATURE CUSTODY	No single party can authorize asset movement
 ORACLE CONSENSUS	Multiple independent validators must attest to each event
 TIMEOUT PROTECTION	If attestation fails within the defined window, the transaction reverts and assets are returned
 ON-CHAIN AUDITABILITY	All lock, mint, burn, and release events are publicly verifiable

PARITY GUARANTEE

This bilateral matching architecture ensures that VaulteddDon Bridge maintains 1:1 asset parity across all supported chains at all times, with no reliance on centralized intermediaries.

05 Vault Architecture

Flexible Staking System

VaulteddDon Smart Vaults offer non-custodial staking with customizable parameters designed for sustainable, real-yield rewards.

Feature	Description
 Lock Periods	30 days to 48 months
 Auto-Compounding	Rewards are automatically reinvested
 Multi-Asset Rewards	Earn in VLD plus partner tokens
 Governance Participation	Stakers earn veVLD voting power

Yield Mechanism

Yields are derived from real economic activity, not inflationary emissions:

Vault Types

Vault	Lock Period	Yield Boost	Features
 Flex Vault	30 days	1x	Liquid, low commitment
 Growth Vault	6 months	1.5x	Balanced risk/reward
 Diamond Vault	12 months	2x	Maximum rewards
 Legacy Vault	48 months	3x	Long-term holders, governance priority

06 Tokenomics

TOKEN DETAILS

Attribute	Value
 Token Name	VaulteddDon
 Ticker	VLD
 Chain	BNB Smart Chain (BEP-20)
 Total Supply	1,000,000,000 VLD
 Supply Type	Fixed (no future minting)

SUPPLY ALLOCATION

TRADING TAXES (BNB CHAIN)

BUY TAX: 1%

Allocation	Percentage
 Liquidity	0.40%
 Vault Reserve	0.35%
 Burn	0.25%

SELL TAX: 4%

Allocation	Percentage
 Liquidity	1.50%
 Vault Reserve	1.50%
 Burn	0.75%
 Growth Fund	0.25%

UTILITY REVENUE LAYER

BRIDGE FEE:

0.2%

Every cross-chain bridge transaction contributes revenue:

Allocation	Percentage
 Burn	50%
 Staking Rewards	30%
 Liquidity	20%

07 Token Utility

\$VLD — POWERING THE ECOSYSTEM

UTILITY		DESCRIPTION
	GOVERNANCE	Vote on protocol upgrades, fee structures, treasury allocation, and ecosystem proposals
	ACCESS & VAULTS	Stake VLD to access premium vaults, higher yields, and exclusive strategies
	STAKE & EARN	Lock VLD to earn a share of protocol fees, yield boosters, and ecosystem rewards
	FEE DISCOUNTS	Use VLD to reduce bridge fees, vault fees, and other protocol charges
	INCENTIVES	Earn VLD through liquidity provision, quests, campaigns, and ecosystem activities
	ECOSYSTEM ACCESS	Gain early access to new features, partner products, and community programs

VESTING SCHEDULE

CATEGORY		SCHEDULE
	COMMUNITY REWARDS	Unlocked linearly over 48 months
	PUBLIC SALE	10% TGE, 90% linear vesting over 12 months
	CORE TEAM & ADVISORS	12-month cliff, then linear vesting over 36 months
	ECOSYSTEM & TREASURY	6-month cliff, then linear vesting over 48 months
	LIQUIDITY & MARKET MAKING	20% TGE, 80% linear vesting over 12 months
	STRATEGIC PARTNERS & RESERVE	6-month cliff, then linear vesting over 24 months

08 Technology Stack

LAYER		TECHNOLOGY
	Smart Contracts	Solidity
	Cross-Chain Layer	LayerZero + Custom Oracle
	Frontend	Next.js + TypeScript
	Backend	Node.js + GraphQL
	Database	PostgreSQL + IPFS
	Infrastructure	AWS + Cloudflare
	Security	CertiK + OpenZeppelin

Key Performance Targets

METRIC		TARGET
	Users	2M+ in 3 years
	Blockchains Supported	50+
	Total Value Secured	\$10B+
	Transactions Processed	100M+
	Community	Global

09 Revenue Engine

VALUE CAPTURE

VaulteddDon captures value from every transaction and cross-chain transfer. Our transparent revenue model fuels deflation, rewards loyal stakers, and strengthens liquidity for long-term growth.

REVENUE SOURCES & ALLOCATION

SOURCE	BURN	STAKING	LIQUIDITY
 Buy Tax (1%)	50%	30%	20%
 Sell Tax (4%)	50%	30%	20%
 Bridge Fee (0.2%)	50%	30%	20%

All fees are automatic, transparent, and enforced by smart contracts.

VALUE AMPLIFICATION LOOP

KEY BENEFITS

DEFLATIONARY MODEL

Continuous burns reduce total supply over time.

SUSTAINABLE REWARDS

Stakers earn real rewards from ecosystem fees.

LIQUIDITY REINFORCEMENT

A portion of every fee strengthens liquidity.

ECOSYSTEM ALIGNMENT

Every mechanism is designed for long-term sustainable growth.

10 Security & Trust

ENTERPRISE-GRADE SECURITY

FEATURE		DESCRIPTION
	Non-Custodial	Users maintain full control of their assets
	Secure Code	Optimized smart contracts with best practices
	Multisig Wallets	Treasury and critical functions protected by multi-signature wallets
	MEV & Front-Run Protection	Built-in protections against MEV and transaction manipulation
	Emergency Stop	Circuit breaker functions to protect users when needed

DECENTRALIZED GOVERNANCE (DAO)

VaulteddDon is community-owned and governed. The more VLD you hold, the more your voice matters.

	Proposals	Anyone can submit proposals for improvement
	Voting Power	Voting power is proportional to VLD holdings
	Community Control	The community decides the future of VaulteddDon
	Treasury Oversight	DAO will govern treasury allocations and spending

AUDITS & VERIFICATION

AUDITOR	STATUS
 CERTIK	Completed — Smart Contract Audit & KYC Verification
 SOLIDPROOF	Completed — Smart Contract Audit & Security Review
 COINSULT	Completed — Contract Verification & Code Analysis

All audit reports are published and verified on the website and partner platforms.

TOKEN VESTING SCHEDULE (SECURITY)

CATEGORY	VESTING
 Seed / Private (15%)	12-month cliff, then 24-month linear vesting
 Team (10%)	6-month cliff, then 18-month linear vesting
 Advisors (5%)	6-month cliff, then 18-month linear vesting
 Ecosystem Growth (10%)	Released based on milestones & DAO approval

All vesting is locked on-chain and publicly verifiable. No team tokens in circulation before vesting.

TRANSPARENCY & ON-CHAIN VERIFIABILITY

ON-CHAIN TRANSACTIONS

All transactions are public and traceable

LIQUIDITY LOCKED

LP is locked for years using trusted lock services

CONTRACT VERIFIED

Source code verified on BscScan for full transparency

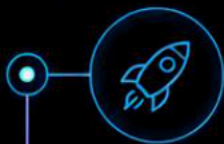

REGULAR REPORTS

Quarterly and monthly transparency reports for the community

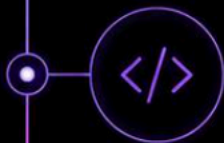

11 Roadmap

**Q4 2026 —
FOUNDATION**

- Architecture finalized
- Whitepaper release
- Seed funding

**Q1 2027 —
DEVELOPMENT**

- Smart contract development
- Security framework
- Private sale

**Q2 2027 —
TESTNET**

- Testnet + bug bounty
- Public sale
- Liquidity deployment

**Q3 2027 —
LAUNCH**

- Mainnet launch (bridge + vault)
- Governance activation
- Staking rewards

**Q4 2027+ —
EXPANSION**

- Cross-chain expansion: Ethereum, Arbitrum, Polygon, Avalanche
- Strategic partnerships
- Yield integrations
- Advanced DeFi products
- DAO governance fully activated

KEY MILESTONES

MILESTONE		TARGET
	Audits & Security	Multiple third-party audits and bug bounties
	Multi-Chain Integrations	Expand to 15+ major blockchains
	Liquidity Growth	Build deep liquidity pools and strategic partnerships
	User Growth	Reach 2M+ users with engaged community
	TVL Target	Achieve \$1B+ TVL with sustainable real yields
	Industry Leadership	Become the leading cross-chain DeFi infrastructure

12 Fair Launch Blueprint

LAUNCH METRICS

METRIC	VALUE
 Soft Cap	150 BNB (~\$90,000)
 Hard Cap	750 BNB (~\$450,000)
 Tokens Sold	150,000,000 VLD (15% of supply)
 Launch MC	≈\$3.0M at listing price
 Presale Price	1 BNB = 200,000 VLD (≈\$0.0030)
 Listing Price	1 BNB = 190,000 VLD (≈\$0.00316, +5%)

CAPITAL DEPLOYMENT (IF HARD CAP REACHED)

CATEGORY	ALLOCATION
 Liquidity	70% (\$315,000 / 525 BNB)
 Growth / Marketing	15% (\$67,500 / 112.5 BNB)
 Vault Reserve	10% (\$45,000 / 75 BNB)
 Audit / Legal / Ops	5% (\$22,500 / 37.5 BNB)

 70% of raised BNB will be used for liquidity + matching VLD tokens.

FIRST 60 DAYS EXECUTION PLAN

01		DEX LAUNCH	Launch on PancakeSwap with deep locked liquidity
02		LISTING PUSH	CoinGecko & CoinMarketCap submissions
03		STRATEGIC PARTNERSHIPS	Secure key partnerships and cross-chain collaborations
04		BRIDGE BETA REVEAL	Showcase cross-chain bridge beta and infrastructure
05		STAKING LAUNCH	Activate staking platform with real rewards
06		ECOSYSTEM GROWTH	Expand utility, integrations, and community incentives

PRESALE VESTING SCHEDULE

PHASE	UNLOCK
 30% TGE	30% unlock at Token Generation Event
 35% DAY 30	35% unlock after 30 days from TGE
 35% DAY 60	35% unlock after 60 days from TGE

This structure ensures stability, prevents dumping, and aligns everyone for long-term growth.

BUYER & INVESTOR PROTECTION

	LP Locked 24 Months — Liquidity locked with renounced access
	Fixed Supply — 1,000,000,000 VLD. No minting. No hidden supply
	No Team Access to Liquidity — LP tokens are locked. Team cannot remove liquidity
	Smart Contract Audited — Contracts audited for security and transparency

13 Ecosystem & Use Cases

Real Utility. Real Impact.

VaulteddDon is more than a token — it's the backbone of a secure, efficient, and inclusive decentralized ecosystem built for the future.

USE CASE	DESCRIPTION	
 Cross-Chain Payments	Seamless, low-fee transactions across multiple blockchains	
 DeFi Vaults	High-yield, secured vaults with automated strategies	
 NFT & Digital Assets	Store, trade, and utilize NFTs with institutional-grade security	
 GameFi & Metaverse	Power in-game economies, assets, and immersive experiences	
 Real-World Integration	Bridge DeFi with real-world applications through partnerships	
 Community Governance	A decentralized future shaped by transparent voting	

STRATEGIC PARTNERS

PARTNER	INTEGRATION
 Chainlink	Oracle Integration 
 CertiK	Smart Contract Audits 
 BNB Smart Chain	Ecosystem Integration 
 Polygon	Scalability Solutions 
 LayerZero.	Cross-Chain Interoperability 
 WalletConnect	Wallet Connectivity 

14 Financial Projections

Year	 Start Supply (M)	 Rewards (M)	 End Supply (M)	 APY	 Revenue	 Burn
2027	150	80	230	~40%	\$120K	\$60K
2028	230	60	290	~24%	\$480K	\$240K
2029	290	40	330	~15%	\$1.2M	\$600K

SUSTAINABLE GROWTH

Consistent rewards and increasing adoption drive long-term growth.

DEFLATIONARY MODEL

Strategic burns reduce supply and increase value over time.

REAL REVENUE

Protocol revenue fuels rewards, liquidity, and ecosystem development.

COMMUNITY FIRST

Every mechanism is designed for the benefit of the community and token holders.

15 Multi-Chain Vision

Vaulteddon is not limited to **BEP-20**.

The long-term goal is to become a cross-chain liquidity and yield infrastructure:

Seamless asset movement across ecosystems

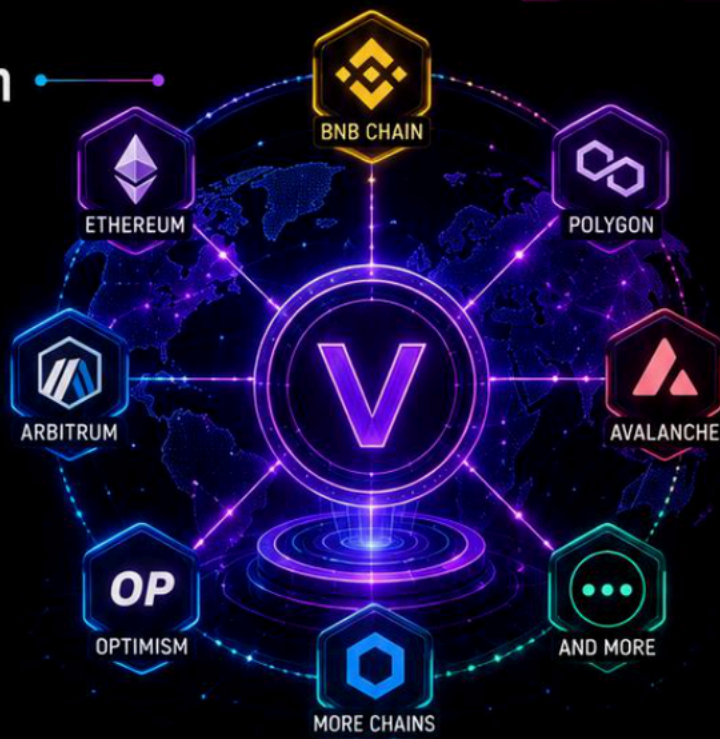

Unified liquidity layer

Scalable staking across chains

BEP-20 is the starting point — not the **destination**.

GLOBAL ACCESS

SECURE INFRASTRUCTURE

FAST TRANSACTIONS

ENDLESS POSSIBILITIES

16 Risk Disclosure

Crypto markets are volatile and prices can fluctuate significantly

Delays in development or listings can occur

Invest only what you can afford to lose

No guarantees of future returns

Smart contract risks exist despite audits

Regulatory environments may change

Vaulteddon is committed to transparency, security, and long-term sustainability.

Do your own research. Invest responsibly.

17 Conclusion

Vaultedd is designed to become a leading cross-chain DeFi platform by combining **secure bridging**, **sustainable staking**, and **deflationary tokenomics** in one ecosystem.

With **fixed supply** mechanics, **real-yield** distribution, governance utility, and a strong interoperability focus, **VLD** is built for long-term growth rather than short-term hype.

The platform's structure is meant to **reward participation**, strengthen liquidity, and create **lasting value** for both users and the wider ecosystem.

Join the Movement

Be part of a secure, transparent, and innovative future.

Together, we build. Together, we grow.

Together, we are Vaultedd.
